SKILLS

Ruby **Rails** **SQL** **HTML/CSS**
JavaScript **jQuery** **React** **Flux** **Git**

PROJECTS

Full-Stack Developer, BrainGain *(Rails, ReactJS, PostgreSQL)* live | github
Single page web application for creating and studying flashcards.
• Upgrades scalability through database indexing and AWS S3.
• Updates real-time graph of study progress with custom algorithms and Flux.
• Organizes retrieved data of multiple models and associations with JBuilder.

Sole Developer, Plips.js *(JavaScript, HTML5)* live | github
Single player, ball-juggling browser game built with object-oriented programming.
• Generates graphics and sound with HTML5 Canvas API and Audio tags.
• Calculates ball render frequency and gravity with custom algorithms.

Sole Developer, dommmDaniel.js *(JavaScript)* github
Library for DOM manipulation, event handling, and AJAX requests.
• Abstracts native DOM API into JavaScript objects for greater ease of development.

EXPERIENCE

Director - *Korean American Modern Dance* **Sept 2011 - May 2016**
• Coordinated 800+ hours of dance rehearsals for team of 15 college students.
• Choreographed hip-hop dance routines and produced accompanying unique musical mixes for 5 competition-winning performances per semester.

Worship Leader - *Korean Baptist Church of Binghamton* **Sept 2012 - May 2016**
• Orchestrated 30-minute modern worship experience for weekly services.
• Tutored band members for 2 hours every Saturday in the keyboard, electric/acoustic guitar, electric bass, singing, and music equalization.

EDUCATION

App Academy **June 2016 - Aug 2016**
• 1000-hr full-stack web development intensive with <3% acceptance rate.
• Incorporates pair programming, TDD, scalability, security, OOP, REST, design patterns, and programming best practices.

Binghamton University **Aug 2011 - May 2016**
Psychology B.A.
Relevant coursework:
- Programming Concepts & Applications (Python)
- Computer Systems I: Machine Organization (C & Assembly)
- Programming with Objects (Java)
